

# Skudo1

## LIQUID INHIBITOR

For heating and cooling systems

PRODUCT FOR PROFESSIONAL USE

### 1 DESCRIPTION

This product has been specifically designed to be effective against corrosion, limescale, hydrogen formation, and microorganism growth. Skudo1 maintains high system efficiency and prevents boiler noise. Thanks to its neutral pH, it is suitable for all types of systems, including those with aluminum components and synthetic materials.

### 2 INSTRUCTIONS FOR USE

Use 1 liter of product per 100 liters of circulating water. Inject the product using a dosing pump, bypass, or radiator valve.

Always ensure the system is clean to maximize protection. Check annually that the molybdate content is not below 180 mg/L.

Remember to record the treatment start date.

It can also be used in industrial cooling circuit waters or systems with aluminum parts and synthetic materials.

### 3 PACKAGING

1L bottle  
 25L tank
