

SkudoMono

GRANULAR ADDITIVE

For heating and cooling systems

PRODUCT FOR PROFESSIONAL USE

1 DESCRIPTION

The product, thanks to its anti-corrosive, algacide, and deoxygenating action, protects boilers, pumps, and heat exchangers. It is suitable for plastic materials and all types of metals. It blocks the corrosive reaction of water and prevents pipes from being attacked by oxygen, hydrogen, and algae. It remains permanently in the system.

2 INSTRUCTIONS FOR USE

A single dose is sufficient to condition a system of 150/200 liters.

3 PACKAGING

60g packaging.
