1 DESCRIPTION

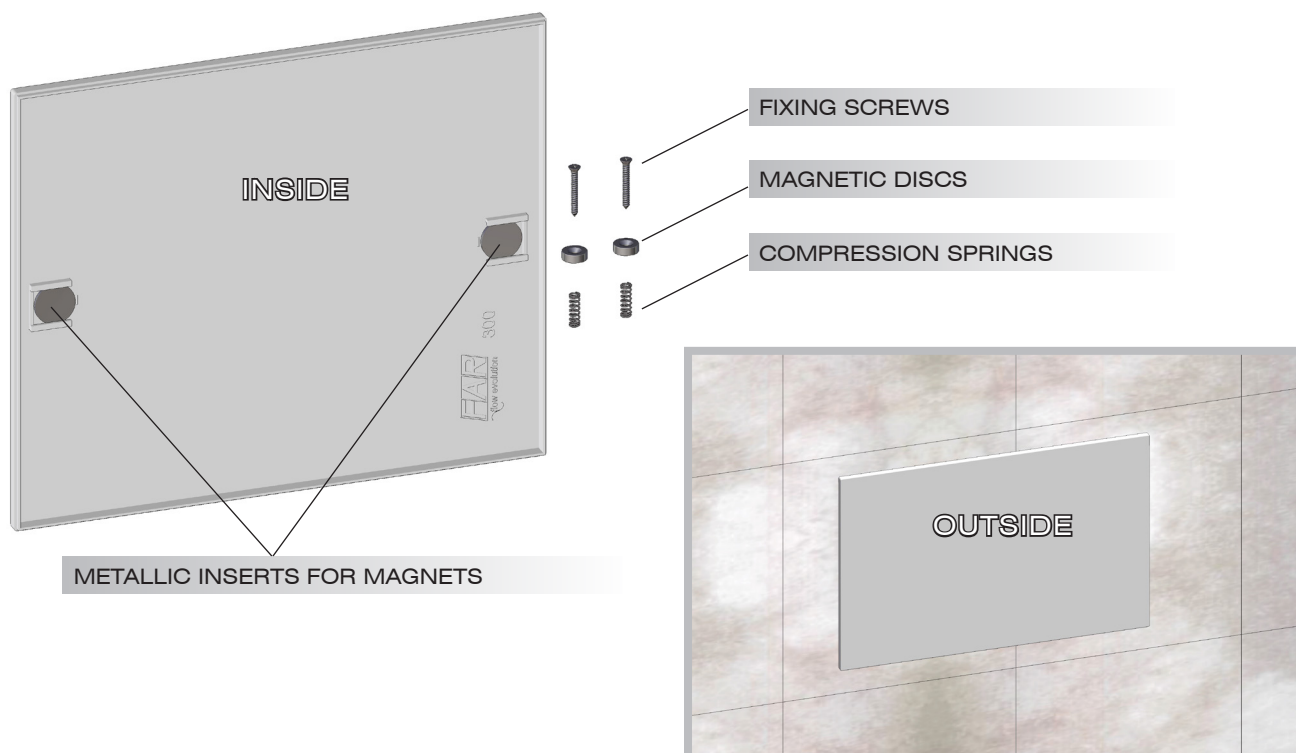

The BeautyFAR cover, available for "TUTTO" boxes Art.7420 (300 mm) and Art.7425 (400 mm), can be used to replace the existing cover supplied together with the box, to get a better aesthetic impact.

The BeautyFAR covers are made of plastic material with glossy white, matt white, matt black and metallic gray finishes, to ensure an excellent furnishing solution and offer a wide variety of choice for the end user.

The opening and closing magnetic system makes easier and speeds up the inspections of the manifold inside the box.

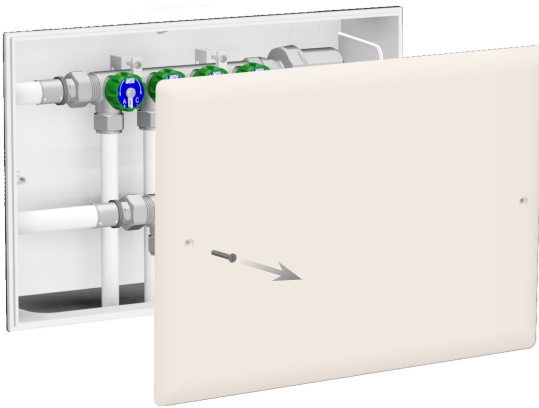

2 CONSTRUCTION DETAILS

Inside the cover there are two magnets for fixing it to the box frame. This system avoids the use of screws to close and open the box, thus obtaining a higher aesthetic rendering.

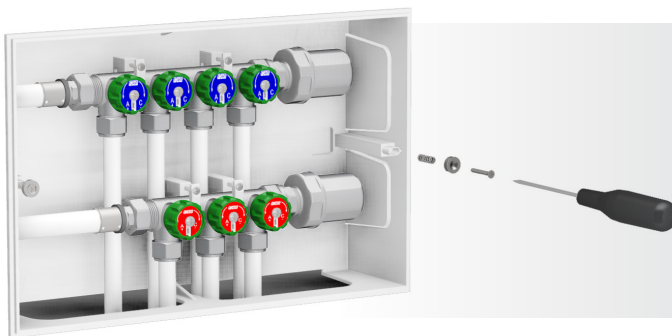

3 INSTALLATION

NB: Because of the magnetic inserts, anybody fitted with a pacemaker is advised to maintain a safe distance during operation and maintenance. Attention should also be paid to the use of electronic equipment near magnetic inserts to avoid interference.

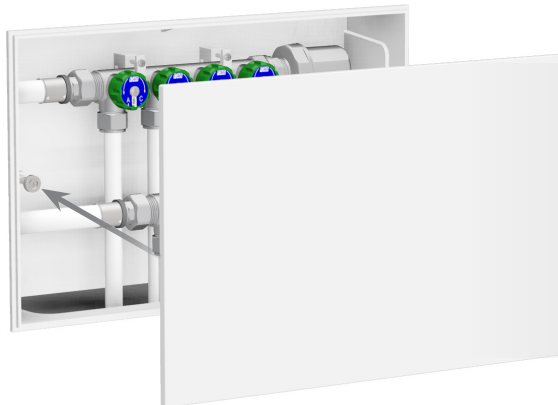

UNSCREW THE FIXING SCREWS OF THE COVER (STANDARD VERSION) INSTALLED ON THE TUTTO PLASTIC BOX AND REMOVE IT

SCREW THE SCREWS (SUPPLIED IN THE PACKAGE) BY INSERTING THE SPRING AND THE MAGNETIC DISC, BY FOLLOWING THE ORDER SHOWN IN THE PICTURE

ACCORDING TO THE DEPTH OF THE TUTTO BOX, TIGHTEN THE SCREWS MAKING SURE THAT THE MAGNETIC DISC PROTRUDES SLIGHTLY FROM THE WALL AND ADJUST IT TO MAKE THE COVER ADHERE COMPLETELY TO THE WALL.

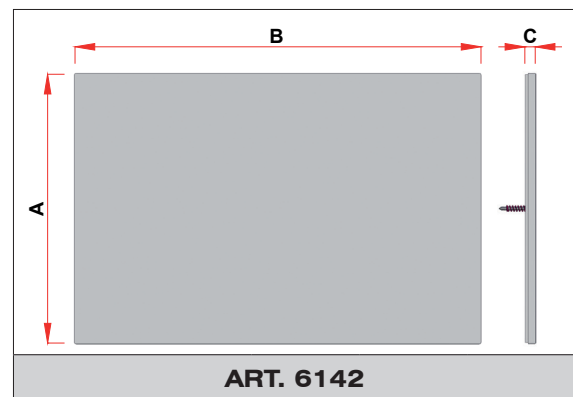

INSTALL THE DESIGNER COVER, MATCHING THE METAL INSERTS ON THE INSIDE, WITH THE MAGNETIC DISCS SCREWED TO THE BOX

IF NECESSARY, ADJUST THE DEPTH OF THE MAGNETIC DISCS TO MAKE THE COVER ADHERE COMPLETELY TO THE WALL

4 TECHNICAL FEATURES

- Cover material: ABS
- Magnet: Neodymium
- Spring: AISI302HS
- Screws: zinc-coated steel
- Metallic inserts for magnet: zinc-coated steel
